

LIVORA

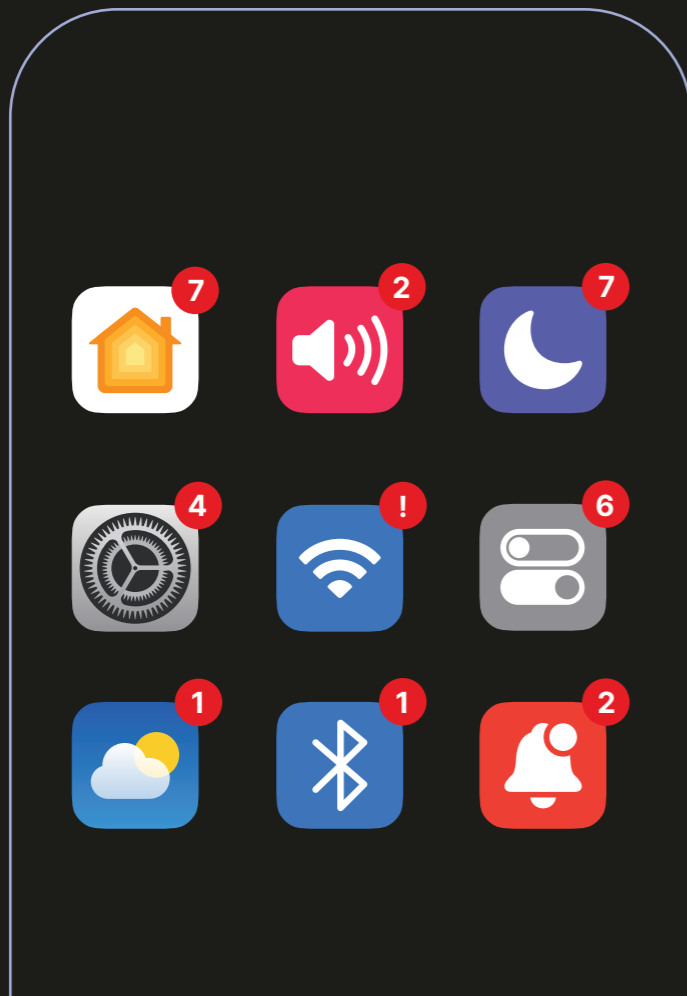

CONNECTED | INTELLIGENT | EFFORTLESS

# The Pain Point

**Digital friction.**  
**The invisible cost of a smart home.**

You were promised convenience. Instead, you got a folder full of apps. One for the bulbs. One for the blinds. One for the gate.

The modern home isn't smart; it's fragmented. Every new device adds a new layer of complexity, turning your living space into a digital chore. We don't believe you should manage your home. We believe your home should manage itself.

Bringing all your smart devices together.

# The One Platform Solution

**One home.**  
**One platform.**  
**Zero friction.**

Livora is the intelligence layer that sits above the chaos. We bring every brand, every protocol, and every device into a single, cohesive ecosystem.

It's truly brand-agnostic. Whether you own the latest tech or legacy hardware, Livora breathes life into them, making them speak one language. Your language.

# Life, Reimagined

## 01 The Good Morning

Sunlight, scheduled.

The home begins to wake up before you do.  
At 7:00 AM, the curtains glide open.  
The temperature gently adjusts.  
In the kitchen, coffee is prepared for your arrival.

The result? A morning with momentum.

## 02 The Away Mode

Everything, taken care of. As you step outside, the home responds.

Lights fade to black.  
The home powers down gently.  
Doors lock themselves.

You step away without a second thought.

# 03

## The Movie Mode

**Cinema, at a tap. No  
remotes. No commands.**

One touch on the Livora Scene Switch, and the room shifts.  
Curtains draw closed.  
Lights fade away.  
A soft glow settles in.

**Suddenly, you're not just watching. You're immersed.**

# 04

## The Good Night

**The final ritual.**

A long press on the bedside switch,  
and the home begins to rest.

The house secures itself.  
The air settles, just right for sleep.  
Lights soften.  
Curtains close.

**You drift off. The home prepares for tomorrow.**

# We start with a conversation, not a catalog.

Smart homes should be designed, not just installed. We don't hand you a box of gadgets and a manual. We hand you a finished experience.

## The Discovery

You book a survey; we map your routines and pain points.

## The Installation

Our engineers build the "One Platform" logic.

## The Support

We stay connected, so you stay effortless.

## The Design

A bespoke setup that fits your architecture.

## The Onboarding

We walk you through your new home.

# Sensing

The house feels your presence and monitors your air.

# Interact

Tactile Scene Switches and Smart Sockets that put you in control.

# Experience

The hardware that does the work—from automated cleaning to climate mastery.

# Your home is waiting to be awakened.

The technology exists. The brands are ready.  
All that's missing is the harmony.

Livora is currently in an exclusive pilot phase. We are selecting a limited number of homes to experience the "One Platform" future before the public launch.

SCAN NOW  
AND JOIN THE WAITLIST

Don't just live in a house.  
Experience a home that understands you.
